PUMPTROL™

Selection Guide — Float Switches

Class 9036 TypeD — Open Tank, General Purpose

Type of Installation	**Horsepower rated**		
Product Features	**2-poles witch, lever operated** **Standard action — contacts close on liquid rise** **Reverse action — contacts open on liquid rise**		
			
Fluids Controlled	Water, hydraulic oils, corrosive fluids		
Fluid Characteristics	Fresh water, sea water, hydraulic oils, and corrosive fluids with a density ≥ 0.8		
Contact Arrangement	**Standard:** 2 N.O. (DPST), **Form R:** 2 N.C. (DPST), **Form H:** 1 N.O. and 1 N.C. (SPDT)		
Degree of Protection	NEMA Type1	NEMA Type 4	NEMA Type 7,9
Electrical Connection	4 screw terminals, 3 knockouts for 1/2 in. conduit entry	4 screw terminals, 2 cable entries, 3/4-14 conduit entry	
Ambient Temperature	–22 to + 200 °F (–30 to+93°C)		
Catalog Numbers	**9036DG...**	**9036DW...**	**9036DR...**
Page	44		

Class 9036 Type G — Open Tank, Heavy Duty

Type of Installation	**Horsepower rated**
Product Features	**2-pole switch** **Standard action — contacts close on liquid rise** **Reverse action — contacts open on liquid rise**

Fluids Controlled	Water, hydraulic oils, corrosive fluids		
Fluid Characteristics	Fresh water, sea water, hydraulic oils, and corrosive fluids with a density ≥ 0.8		
Contact Arrangement	**Standard:** 2 N.O. (DPST), **Form R:** 2 N.C. (DPST), **Form H:** 1 N.O. and 1 N.C. (SPDT)		
Degree of Protection	NEMA Type 1	NEMA Type 4	NEMA Type 7, 9
Electrical Connection	4 screw terminals, 3 knockouts for 1/2 in. conduit entry	4 screw terminals, 2 cable entries, 3/4-14 conduit entry	
Ambient Temperature	–22 to +200 °F (–30 to +93 °C)		
Catalog Numbers	**9036GG...**	**9036GW...**	**9036GR...**

Class 9049 — Accessories for Class 9036 Type D and G

Accessory Kits	Tapped-at-Top Floats (#304 SS) [1]		Center-Hole Floats (#304 SS) [2]		Additional Tubing [3]	
						
Tubing (rods)	5 ft brass	5 ft SS	5 ft brass	5 ft SS	2.5 ft brass	2.5 ft SS
Net buoyancy in water 7 in. float [4]	60	60	70	70	—	—
Total weight of stops oz (g)	3 (85)	3 (85)	6 (170)	6 (170)	—	—
Number of stops	2	2	4	4	—	—
Weight of the included 5 ft rod oz (g)	18.5 (524)	16.9 (479)	18.5 (524)	16.9 (479)	—	—
Weight per ft of extra rod oz (g)	3.7 (105)	3.4 (96)	3.7 (105)	3.4 (96)	3.7 (105)	3.4 (96)
Catalog Numbers	**9049A6**	**9049A6S**	**9049A6C**	**9049A6CS**	**9049T1**	**9049T1S**

[1] Maximum recommended tubing length for tapped-at-top float: 12.5 ft (3810 mm).

[2] Maximum recommended tubing length for center-hole float: 30 ft (9144 mm).

[3] Additional tubing kits add on to float accessory kits and include a connector.

[4] Net buoyancy calculated with the float 80% submerged, allowing for a 20% operating margin. Buoyancy data calculated for use in water. Contact the Sensor
Competency Center for buoyancy data in media having a specific gravity different than water (1.0).

NOTE: When ordering float accessories, first specify the desired accessory kit, then as a second item, give the catalog number and the quantity of the additional tubing kits required. For example, for a 9049A6C kit with 15 ft of tubing, specify:

• 9049A6C, quantity = 1 (float with 5 ft of tubing)

• 9049T1, quantity = 4 (2.5 ft of tubing each, for a total of 10 additional ft)

Compensating Spring

Compensating springs support the weight of long rods that cannot be supported by center-hole floats.

Example

Calculation example	**Float buoyancy**	70.0 oz
Measuring 15 ft of tank depth	**Total weight**	(61.5 oz)
System has 15 ft of brass rod, 4 stops, and a center hole float.	Weight of stops:	(6.0 oz)
	Weight of 5 ft of brass rod (included):	(18.5 oz)
Buoyancy is positive, so no compensating spring is required	Weight of 10 ft of brass rod (separate):	(37.0 oz)
	Buoyancy	8.5 oz

Class 9036 Type FG — Open Tank, Pedestal Style

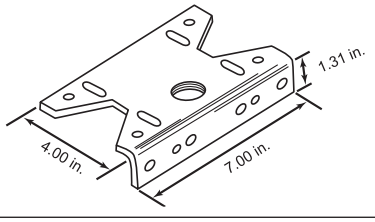
Type of Installation	Horsepower rated		
Product Features	**2-pole switch, forward or reversing** **Contacts open or close on liquid rise (field convertible)**		
			
Fluids Controlled	Water, hydraulic oils, corrosive fluids		
Fluid Characteristics	Fresh water, sea water, hydraulic oils, and corrosive fluids with a density ≥ 0.8		
Contact Arrangement	2 N.O. or 2 N.C. (DPST), depending on rod connection		
Degree of Protection	NEMA Type 1		
Electrical Connection	4 screw terminals, 2 cable entries 0.88 in. (22.4 mm) with 0.84 in. (21.3 mm) across flat		
Ambient Temperature	–22 to +200 °F (–30 to +93 °C)		
Catalog Numbers	**9036FG**	**9049A60**	**9049A61**
Description	2-pole, pedestal-style sump pump switch	Plastic, center-hole float	33.75 in. aluminum rod, 2 float stop assemblies, and attaching hardware
Page	46		

NOTE : Also available in batch of 250 pcs : “Add C250” at the end of your reference

Class 9049 Type UMS1 — Universal Mounting Plate

Description	Mounting plate
Product Features	Pedestal mount
	
Material	Cold rolled steel
Finish	Painted, powder coated
Mounting Connection	Threaded to accept 1 in. diameter iron pipe
Catalog Numbers	**9049UMS1**

Figure 1: 9049UMS1 Dimensions



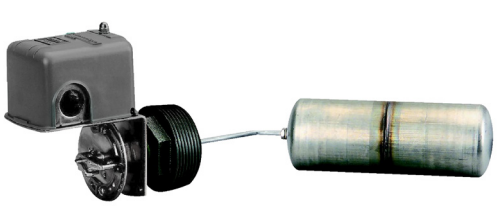
Class 9037 Type E — Closed Tank, Flange Mounted

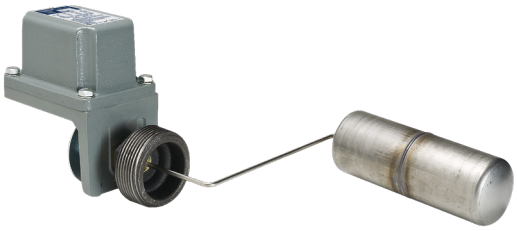
Type of Installation	**Horsepower rated**		
Product Features	**2-pole switch** **Standard action — contacts close on liquid rise** **Reverse action — contacts open on liquid rise**		

Fluids Controlled	Water, hydraulic oils, corrosive fluids		
Fluid Characteristics	Fresh water, sea water, hydraulic oils, and corrosive fluids with a density ≥ 0.8		
Contact Arrangement	Standard: 2 N.O. (DPST), Form R: 2 N.C. (DPST)		
Degree of Protection	NEMA Type 1	NEMA Type 4	NEMA Type 7, 9
Electrical Connection	4 screw terminals, 3 knockouts for 1/2 in. conduit entry	4 screw terminals, 2 cable entries, 3/4-14 conduit entry	
Ambient Temperature	–22 to +200 °F (–30 to +93 °C)		
Catalog Numbers	**9037EG...**	**9037EW...**	**9037ER...**
Page	48		

NOTE: For float and rod kits, refer to page 50.

Class 9037 Type H — Closed Tank with Bushing

Type of Installation	**Horsepower rated**		
Product Features	**2-pole switch** **Standard action — contacts close on liquid rise** **Reverse action — contacts open on liquid rise**		
	 		




Fluids Controlled	Water, hydraulic oils, corrosive fluids		
Fluid Characteristics	Fresh water, sea water, hydraulic oils, and corrosive fluids with a density ≥ 0.8		
Contact Arrangement	**Standard:** 2 N.O. (DPST). **Form R:** 2 N.C. (DPST). [1]		
Degree of Protection	NEMA Type 1	NEMA Type 4	NEMA Type 7, 9
Electrical Connection	4 screw terminals, 3 knockouts for 1/2 in. conduit entry	4 screw terminals, 2 cable entries, 3/4-14 conduit entry	
Ambient Temperature	–22 to +200 °F (–30 to +93 °C)		
Catalog Numbers	**9037HG...**	**9037HW...**	**9037HR...**
Page	52		

[1] NEMA Type 1 devices can be fiel d modified for reverse action. NEMA Type 4, 7, and 9 devices cannot be field modified for reverse action.

Class 9038 Type A — Mechanical Alternator, Open Tank

Type of Installation	**Horsepower rated**		
Product Features	**4-pole switch** **Standard action — contacts close on liquid rise** **Reverse action — contacts open on liquid rise**		

Fluids Controlled	Water, hydraulic oils, corrosive fluids		
Fluid Characteristics	Fresh water, sea water, hydraulic oils, and corrosive fluids with a density ≥ 0.8		
Contact Arrangement	4 N.O. (2 DPST)		
Degree of Protection	NEMA Type 1	NEMA Type 4	NEMA Type 7, 9
Electrical Connection	8 screw terminals, 4 knockouts for 1/2 in. or 3/4 in. conduit entry	8 screw terminals, 2 cable entries, 3/4-14 conduit entry	
Ambient Temperature	–22 to +200 °F (–30 to +93 °C)		
Catalog Numbers	**9038AG...**	**9038AW...**	**9038AR...**
Page	54		

Class 9038 Type C — Mechanical Alternator, Closed Tank

Type of Installation	**Horsepower rated**		
Product Features	**4-pole switch** **Standard action — contacts close on liquid rise** **Reverse action — contacts open on liquid rise**		

Fluids Controlled	Water, hydraulic oils, corrosive fluids		
Fluid Characteristics	Fresh water, sea water, hydraulic oils, and corrosive fluids with a density ≥ 0.8		
Contact Arrangement	4 N.O. (2 DPST), alternating contacts		
Degree of Protection	NEMA Type 1	NEMA Type 4	NEMA Type 7, 9
Electrical Connection	8 screw terminals, 8 knockouts for 1/2 in. or 3/4 in. conduit entry	8 screw terminals, 2 cable entries, 3/4-14 conduit entry	
Ambient Temperature	–22 to +200 °F (–30 to +93 °C)		
Catalog Numbers	**9038CG...**	**9038CW...**	**9038CR...**
Page	56		

Class 9038 Type D — Mechanical Alternator, Closed Tank

Type of Installation	**Horsepower rated**		
Product Features	**4-pole switch** **Standard action — contacts close on liquid rise** **Reverse action — contacts open on liquid rise**		

Fluids Controlled	Water, hydraulic oils, corrosive fluids		
Fluid Characteristics	Fresh water, sea water, hydraulic oils, and corrosive fluids with a density ≥ 0.8		
Contact Arrangement	4 N.O. (2 DPST)		
Degree of Protection	NEMA Type 1	NEMA Type 4	NEMA Type 7, 9
Electrical Connection	8 screw terminals, 8 knockouts for 1/2 in. or 3/4 in. conduit entry	8 screw terminals, 2 cable entries, 3/4-14 conduit entry	
Ambient Temperature	–22 to +200 °F (–30 to +93 °C)

PUMPTROL™

Electromechanical Pressure Switches, Class 9013 Types F and G

Introduction

The Pumptrol Class 9013 Type F commercial pressure switches are UL Listed and CSA certified as commercial control equipment. Type G pressure switches are UL Listed and CSA certified as commercial / light industrial control equipment.

The Type FHG compressor pressure switch is used to control electrically driven air compressors. It is diaphragm actuated, and its contacts open on rising pressure.

The Type FSG, FTG, FYG, and FRG water pump pressure switches are used to control electrically driven water pumps. They are diaphragm actuated.

- The Type FSG standard water pump switch is suitable for all types of pumps, including jets, submersible, and reciprocating.
- The Type FTG fixed differential water pump switch is suitable for all types of pumps, including jets, submersible, and reciprocating. It is an ideal choice for OEM markets. Minimum quantity restrictions apply.
- The Type FYG is designed to meet higher horsepower and pressure requirements.
- The Type FRG is reverse acting: the contacts open on falling pressure.

The Type G commercial / light industrial pressure switch is used to control electrically driven water pumps and air compressors. It has higher electrical ratings for direct control of motors in pump and compressor applications. The Type G switch is diaphragm actuated, and its contacts open on rising pressure.

Setting Points

Every pressure switch has two setting points: one on rising pressure and one of falling pressure. For pumps and compressors, the setting point on rising pressure is called the trip point or cut-out; the setting point on falling pressure is called the reset point or cut-in.

Differential

The differential is the difference in pressure between the trip point (cut-out) and the reset point (cut-in). It can be adjustable or fixed. **Example** — Cut-in (30 psi) / Cut-out (50 psi): Differential = 20 psi

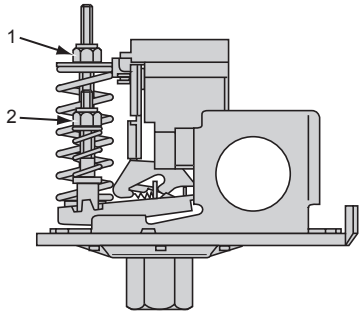
Range

The range indicates the pressure limits within which the settings can be adjusted. The range is referenced to the setting point on rising pressure (trip point). The differential subtracts from the trip point setting. When using a diaphragm-actuated switch, system pressure during the normal operating cycle should never exceed the upper limit of the range. Excessive pressure will greatly reduce the life of the diaphragm.

Maximum Allowable Pressure

Maximum allowable pressure is the pressure to which a switch can be subjected without causing a change in operating characteristics, shift in settings, or damage to the device. Pressure surges may occur in a system during the start up of a machine or from valve operation. Surges are not normally detrimental to the life of a switch if the surge is within the maximum allowable pressure rating of the switch. Diaphragm-actuated switches should not be subjected to more than 10 surges per day. More frequent surges will greatly reduce the life of the diaphragm.

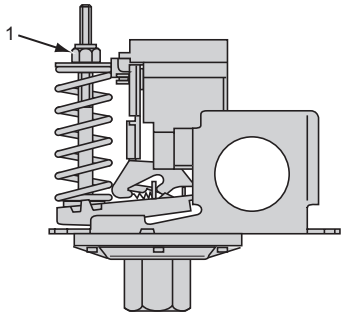
Settings



Pressure switches with adjustable differential (Types FSG, FYG, and FRG)

When setting the pressure switch, adjust the setting point on falling pressure first, then the setting point on rising pressure (PB).

- **Setting point on falling pressure**
  The setting point on falling pressure is set by adjusting range-nut **1**.
- **Setting point on rising pressure**
  The setting point on rising pressure is set by adjusting range-nut **2**.

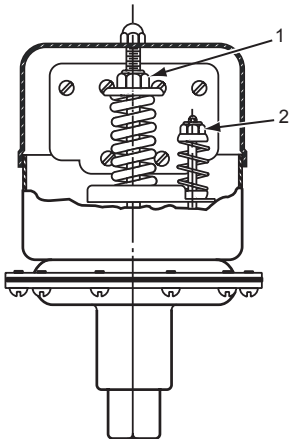


Pressure switches with fixed differential (Types FTG and FHG)

Only the setting point on rising pressure is adjustable.

- **Setting point on rising pressure**
  The setting point on rising pressure is set by adjusting range-nut **1**.
- **Setting point on falling pressure**
  The setting point on falling pressure is not adjustable.

The difference between the tripping and resetting points of the contact is the inherent differential of the switch (due to factors such as contact differential and friction).



Pressure switches with adjustable differential (Type G)

When setting the pressure switch, adjust the setting point on falling pressure first, then the setting point on rising pressure.

- **Setting point on falling pressure**
  The setting point on falling pressure is set by adjusting range-nut **1**.
- **Setting point on rising pressure**
  The setting point on rising pressure is set by adjusting range-nut **2**.

General Specifications
Types FSG/FSW, FTG/FTW, and FYG/FYW

Table 1: Environment

Type	FSG/FSW	FTG/FTW	FYG/FYW
Conforming to standards	UL 508, NEC Article 430-84, ANSI/NSF Standard 61, FDA 21CFR.2600		
Product approvals	UL, CSA		
Degree of protection	IP20, NEMA Type 1 (Types F•G). NEMA Type 3R (Types F•W) must be mounted in vertical position to maintain enclosure rating.		
Operating position	IP20 and NEMA Type 1 in any position, NEMA Type 3R in the vertical position only.		
Operating rate	10 cycles/m		
Repeat accuracy	±3% of the range		
Ambient air temperature			
Storage	–22 to 158 °F (–30 to 70 °C)		
Operation	–22 to 158 °F (–30 to 70 °C)		
Fluids Controlled	Fresh water (or sea water with Form Q)		
Materials	Cover: polypropylene, Noryl® thermoplastic resin or equivalent for Type 3R. Component material in contact with fluid: flange, zinc plated or equivalent (fluid entry), nitrile or equivalent rubber (diaphragm)		
Fluid connection	1/8" NPSF internal, 1/4" NPSF internal, 1/2" NPT external, 1/4" bayonet (barbed), 90° elbow 1/4" bayonet, four-way flange, 3/8" NPSF internal, 1/4" flare and other specials		
Electrical connection	2 open side entries, 0.88 in. diameter, with two flats		

Table 2: Contact Block Characteristics

Type of contacts	One 2 pole, 2 N.C. (4 terminal) contacts, snap action
Resistance across terminals	< 25 mΩ
Short-circuit protection	5,000 A
Connection	Screw clamp terminals. Clamping capacity up to 10 AWG (5.261 mm^2)
Electrical durability	100,000 cycles

Table 3: Electrical Ratings

Types FRG, FHG, and G

Table 4: Environment

Type	FRG	FHG	G
Conforming to Standards	UL 508, NEC Article 430-84, ANSI/NSF Standard 61, FDA 21CFR.2600		
Product approvals	UL, CSA		
Degree of protection	IP20, NEMA Type 1. NEMA Type 3R (only Types G•B) must be mounted in vertical position to maintain enclosure rating		
Operating position	IP20 and NEMA Type 1 in any position, NEMA Type 3R in the vertical position only		
Operating rate	10 cycles/m		
Repeat accuracy	±3% of the range		
Ambient air temperature			
Storage	–22 to 158 °F (–30 to 70 °C)		
Operation	–22 to 158 °F (–30 to 70 °C)		
Fluids Controlled	Fresh water (or sea water with Form Q)		
Materials	Cover: polypropylene, Noryl thermoplastic resin or equivalent for Type 3R, Component material in contact with fluid: flange, zinc plated or equivalent (fluid entry), nitrile or equivalent rubber (diaphragm)		
Fluid connection	1/8" NPSF internal, 1/4" NPSF internal, 1/2" NPT external, 1/4" bayonet (barbed), 90° elbow 1/4" bayonet, four-way flange, 3/8" NPSF internal, 1/4" flare and other specials		
Electrical connection	2 open side entries, 0.88 in. diameter, with two flats		3 knockouts for 1/2" conduit

Table 5: Contact Block Characteristics

Type of contacts	One 2 pole, 2 N.C. (4 terminal) contacts, snap action Type FRG: 1 or 2 pole, 2 N.O. (2 or 4 terminal) contacts, snap action
Resistance across terminals	< 25 mΩ
Short-circuit protection	5,000 A
Connection	Screw clamp terminals. Clamping capacity up to 10 AWG (5.261 mm^2)
Electrical durability	100,000 cycles

Selection and Specifications

Type FSG, 2-Pole, 2 N.C. Contacts
Degree of Protection IP20, NEMA Type 1

Flange Style				Adjustable range of setting point 20.3–66.7 psi (1.4–4.6 bar) **Contacts open on rising pressure**				
Differential	Adjustable			
Fluid Connections	1/4" NPSF internal	1/4" NPT external		
Catalog Numbers				
NEMA Type 1, IP20	**9013FSG2**	**9013FSG9**	**9013FSG10**	**9013FSG20**
NEMA Type 3R [1]	**9013FSW2**			
Fluids Controlled	Water	Water	Water	Water
Pressure Range				
Cut-out psig (bar)	20–65 (1.4–4.5)	20–65 (1.4–4.5)	20–65 (1.4–4.5)	20–65 (1.4–4.5)
Cut-in psig (bar)	5–45 (0.3–3.1)	5–45 (0.3–3.1)	5–45 (0.3–3.1)	5–45 (0.3–3.1)
Weight, lb (kg)	0.75 (0.340)	0.75 (0.340)	0.75 (0.340)	0.75 (0.340)
Supplemental Specifications (not shown under General Specifications)				
Differential psig (bar)	15–30 (1.0–2.1)			
Maximum Allowable Pressure psig (bar)	65 (4.5)			
Cable Entry	2 cable entries 0.88 in. (22.4 mm) with 0.84 in. (21.3 mm) across flats			
Pressure Switch Style	Diaphragm			

[1] Must be mounted in a vertical position to maintain enclosure rating.

Ordering information

1. Select the catalog number from the table above.
2. Select the pressure code and add the code designation to the end of the catalog number. Ensure that the pressure code falls within the limits of the device as shown in the device listings.
3. If special features are desired, add the appropriate Form letter to the catalog number after the pressure code. Arrange the Form letters in alphabetical sequence when ordering more than one special feature.
4. Add the packaging code at the end of the sequence, after the Forms. (For example, to order a standard pack of 20 devices, specify 9013FSG2J21MIC20.) If no packaging code is indicated, the devices will be shipped individually packaged.

Pressure codes

NOTE: Existence of a code does not imply that the code is available for any or all devices.

Settings (psi)	Code
5–21	J15
8–20	J16
20–40	J20

Cable Entry	2 cable entries 0.88 in. (22.4 mm) with 0.84 in. (21.3 mm) across flats			
Pressure Switch Style	Diaphragm			

Ordering information

1. Select the catalog number from the table above.
2. Select the pressure code and add the code designation to the end of the catalog number. Ensure that the pressure code falls within the limits of the device as shown in the device listings.
3. If special features are desired, add the appropriate Form letter to the catalog number after the pressure code. Arrange the Form letters in alphabetical sequence when ordering more than one special feature.
4. Add the packaging code at the end of the sequence, after the Forms. (For example, to order a standard pack of 20 devices, specify 9013FRG2J21MIC20.) If no packaging code is indicated, the devices will be shipped individually packaged.

Pressure codes

NOTE: Existence of a code does not imply that the code is available for any or all devices.

Modifications (Forms)

NOTE: Modifications G4 and Z22 can be field installed, all others are factory installed only.

Description	Form letter
Standard pack of 20 devices per box	C20 [1]
Addition of a second ground screw	G4
Maintained manual cut-out lever (Auto-Off)	M1
Pulsation plug (copper)	P
½" conduit bushing—½" long thread — on left	T
Slip-on connectors (load side terminals only)	U
Slip-on connectors (line and load side terminals)	U2
Factory sealed range stud	W
Two-way pressure release valve	X
Quick connect two-way pressure release valve (for use with Polyflow Tubing)	X1
Black cover	Z22

[1] Additional bulk packages are available. See Table 7 on page 37 on following page.

Table 7: Bulk Package Form Numbers for 9013F Pressure Switches

Description	Bulk Package Quantity	20	50
Product without Forms M1, M3, M4, M5, T, X1	**9013FHG** (without 1/4" four-way)	C20	C50
	9013FHG4, 14, 24, 34, 44, 54 (with 1/4" 4-way flange)	C20	C50

Pressure Switch Style	Diaphragm			

[1] Must be mounted in vertical position to maintain enclosure rating.

Ordering information

1. Select the catalog number from the table above.
2. Select the pressure code and add the code designation to the end of the catalog number. Ensure that the pressure code falls within the limits of the device as shown in the device listings.
3. If special features are desired, add the appropriate Form letter to the catalog number after the pressure code. Arrange the Form letters in alphabetical sequence when ordering more than one special feature.
4. Add the packaging code at the end of the sequence, after the Forms. (For example, to order a standard pack of 10 devices, specify 9013GHG2J99RZC10.) If no packaging code is indicated, the devices will be shipped individually packaged.
   To order a standard pack of 10 devices per box C10 (available on GHB, GHG, GSB, and GSG) see page 36 for Form C10.

Pressure codes

NOTE: Existence of a code does not imply that the code is available for any or all devices.

Ordering information

[1] Select the catalog number from the table above.

[2] Select the pressure code and add the code designation to the end of the catalog number. Ensure that the pressure code falls within the limits of the device as shown in the device listings.

[3] If special features are desired, add the appropriate Form letter to the catalog number after the pressure code. Arrange the Form letters in alphabetical sequence when ordering more than one special feature.

[4] Add the packaging code at the end of the sequence, after the Forms. (For example, to order a standard pack of 10 devices, specify 9013GHG2J99RZC10.) If no packaging code is indicated, the devices will be shipped individually packaged. To order a standard pack of 10 devices per box C10 (available on GHB, GHG, GSB, and GSG) see page 36 for Form C10.

Ordering information

1. Select the catalog number from the table above.
2. Select the pressure code and add the code designation to the end of the catalog number. Ensure that the pressure code falls within the limits of the device as shown in the device listings.
3. If special features are desired, add the appropriate Form letter to the catalog number after the pressure code. Arrange the Form letters in alphabetical sequence when ordering more than one special feature.
4. Add the packaging code at the end of the sequence, after the Forms. (For example, to order a standard pack of 10 devices, specify 9013GHG2J99RZC10.) If no packaging code is indicated, the devices will be shipped individually packaged.
   To order a standard pack of 10 devices per box C10 (available on GHB, GHG, GSB, and GSG) see page 36 for Form C10.

Pressure codes

NOTE: Existence of a code does not imply that the code is available for any or all devices.

Settings (psi)	Code	Settings (psi)	Code

Float Switches — Class 9036, 9037, and 9038

Introduction

9036DG2R

Telemecanique Sensors brand offers a wide range of electromechanical level control products.

- **Class 9036, Open Tank**
- **Class 9037, Closed Tank**
- **Class 9038, Mechanical Alternators**

Class 9036 Open Tank

Type D and G

9036GG2

The Class 9036 Type D and G float switches are lever operated and designed for open tank applications. These switches are floor mounted, or they can be pedestal mounted using mounting plate 9049UMS1. They are available in NEMA Type 1, Type 4, or Type 7 and 9 enclosures.

Type FG

The Class 9036 Type FG30 pedestal-style sump pump switch is designed for liquid level control with electric-motor operated pumps, either directly or through a magnetic starter. It can also be used to activate alarms in liquid level control systems. The upward or downward movement of the lever arm of the float switch controls the On and Off positions corresponding to the water level changes required to turn the pump or alarm on and off.

NOTE: The rod for this device is 33.75 in. long. It cannot be lengthened.

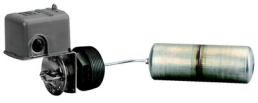
9036FG
9049A60
9049A61

Class 9037 Closed Tank

9037E

Type E

The Class 9037 Type E switches are flange mounted. Float movement is transmitted through a quad ring seal. Each switch consists of a basic switch, float rod, and float. The switch can be configured in the field for contacts that open on liquid rise or close on liquid rise. These switches are used for top mounted or side mounted, closed tank applications.

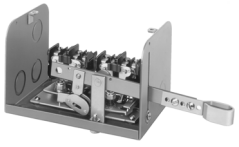


9037HG

Type H

The Class 9037 Type H switches are attached to the tank by means of a 2-1/2 in. bushing. An external pointer indicates the float position within the tank when the unit is mounted. Switches come complete with stainless steel float and rod. A nitrile rubber seal, such as a Buna-N quad ring seal, is used between the float rod and the sealing connector. Normal application is at atmospheric pressure. Where higher pressures are encountered, the available Viton® seal allows the switch to withstand tank pressures up to 50 psi at ambient temperatures up to 200 °F. Occasional replacement of the quad ring seal may be necessary.

Class 9038 Mechanical Alternators



9038AG1

Type A (Open Tank)

The Class 9038 Type A Open Tank level switch is a mechanical alternator designed to provide motor alternation in the operation of two motors.

9038CG36

Type C (Closed Tank, Bushing Mounted)

The Class 9038 Type C Closed Tank level switches are bushing mounted. Float movement is transmitted through a quad ring seal. Each switch consists of a basic switch, rod, and float.

Type C switches are attached to the tank by means of a 2-1/2 in. bushing. An external pointer indicates the float position within the tank when the unit is mounted. Switches come complete with bushing, stainless steel float, and rod.

Occasional replacement of the quad ring may be necessary.

9038DG
9049ER5
9049EF1

Type D (Closed Tank, Flange Mounted, Top)

Type D mechanical alternators are designed for applications where flange mounting is to be made at the top of a closed tank.

PUMPTROL™

9036DG2

9036GG2

Selecting a Float Switch

Standard float switches have two contacts that close when the liquid rises above the designated level. This contact configuration is used for tank emptying applications. Float switches are also available with reverse (Form R) and double throw (Form H) contacts. Form R switches, used for tank filling applications, have two contacts that open when the liquid rises above the designated level. Form H switches, which can be used for both applications, have one normally open (N.O.) and one normally closed (N.C.) contact.

To select the proper Telemecanique Sensors float switch, determine the following:

- Type and shape of tank (open, closed, sump, etc.)
- Enclosure requirements
  - **NEMA Type 1:** For general purpose applications intended for indoor use.
  - **NEMA Type 4:** For watertight and dusttight applications for either indoor or outdoor use.
  - **NEMA Type 7 and 9:** For explosion proof applications. Suitable for Class I, Division 1 and 2, Groups C and D and Class II, Division 1 and 2, Groups E, F, and G hazardous locations.
- Total level change required
- Mounting requirements (such as flange mounting or screw-in bushing)
- Horsepower, phase, and voltage requirements
- Float material
  - Stainless steel (SS)
  - Plastic (available on 9036FG30 and as a Form for use with diesel fuel)
- Rod material
  - Brass
  - Stainless steel (SS)

In direct motor control applications, float switch ratings must be greater than or equal to the pump motor ratings.

NOTE: Contact the Sensor Competency Center when using float switches in liquids with a specific gravity different than water (1.0).

Specify the Class and Type when ordering float switches or accessory kits.

Selecting Floats and Rods

Class 9036 and Class 9038 Type A float switches are actuated with the Class 9049 Type A line of accessories. Select the float and rod material according to the corrosiveness of the liquid used in the application. Two types of float kits are offered:

- Tapped-at-top float (Class 9049 Type A6, A6S)
- Center-hole float (Class 9049 Type A6C, A6CS)

The tapped-at-top float is for applications requiring short lengths of tubing and small liquid level changes. The maximum tubing length is 12 ft (3.66 m). Adequate space must be available to allow for ceiling clearance when the level changes. The float must be buoyant enough to lift the tubing, stop collars, and switch lever. The rod has two stops, one above and one below the switch lever. The position of the stops determines the amount of water level change.

The center-hole float is used in applications requiring long lengths of tubing and large liquid level changes. A compensating spring, used for longer lengths of tubing, supports the weight of the tubing and stops. When a compensating spring is used, the float must be buoyant enough to lift up the switch lever and heavy enough to trip the switch lever down. The rod has four stops. The position of the stops on the rod above and below the float determines the amount of water level change.

Temperature Ratings

Table 8 : Temperature Limitations for all Float Switches

Ambient	**Min.**	–22 °F (–30 °C)
	Max.	200 °F (93 °C)

Electrical Ratings

Class 9036 Type D and G Open Tank Float Switches

Table 11 lists Class 9036 float switches and modifications.

- When ordering a **factory installed modification**, add the Form number to the end of the float switch catalog number. For example, to select a 9036DG2 switch with reverse action, order 9036DG2R.
- **Field installed modifications**, when available, are ordered as kits.

Table 11: Class 9036 Float Switches

NEMA Type 7, 9	**9036DR31**	**9036DR31R**	**9036GR1** [2]	**—**
NOTE: A compensating spring supports the weight of long rods that cannot be supported by center-hole floats. A compensating spring is standard on Types GR and GW, and can be ordered as a modification (Form C) on other Class 9036 Type D and G float switches.				
Modifications			**Factory Installed**	**Field Installed**
			Class 9036 Form	**Kit Catalog Number**
For Type D (General Purpose)				
Reverse action (Type DG)			R	**9049A58**
Compensating spring and reverse action (Types DG, DR, and DW)			CR	—
For Type G (Heavy Duty)				
Reverse action [3]			R	—
Compensating spring (Type GG) [4]			C	**9049A13**
1 N.O.–1 N.C. contact configuration			H	—

[1] Contact action can be converted in the field by installing the appropriate float rod lever.

[2] Compensating spring standard. Use center-hole float accessories.

[3] Type GG is field convertible without the use of a kit. Types GR and GW are not field convertible.

[4] Compensating spring standard on Types GR and GW.

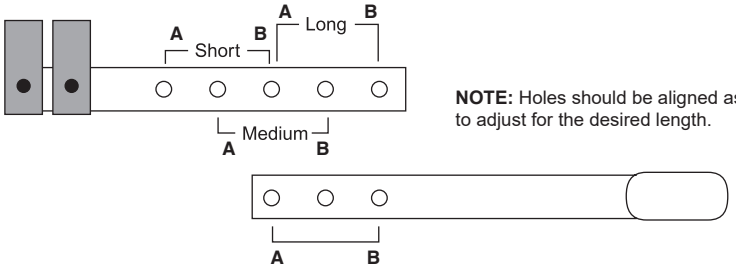
Table 12 lists the trip forces and compensating spring requirements for Class 9036 Type D and G float switches. The trip force can be adjusted on the Type G switches by changing the lever length position.

Table 12: Maximum Trip Forces for Class 9036 Float Switches

Class 9036 Type and Form		DG2	DG2R	DW31	DW31R	DR31	DR31R	GG2		GG2R		GR1, GW1		
Lever Length Position		—	—	—	—	—	—	Short	Long	Short	Long	Short	Medium	Long
Force Up to Trip (oz)		9	8	8	8	8	8	33	21	30	22	24	22	20
Force Down to Trip (oz)		8	8	8	8	8	8	39	27	24	16	31	29	27
Maximum Supported Weight (oz)	Without Compensating Spring	6	4	5	5	5	5	25	13	18	11	19	17	16
	With Compensating Spring	60	60	66	66	66	66	[1]	100	[1]	150	80	72	64

[1] The compensating spring is not effectiwve in combination with short lever length position.

Figure 3: Lever Length



NOTE: Holes should be aligned as shown to adjust for the desired length.

Table 13 lists Class 9049 accessory kits, which are ordered separately from Class 9036 Type D and G float switches. A **float kit** is required; a tubing kit and replacement float do not provide all needed parts.

Table 13: Class 9049 Accessories for Class 9036 Type D and G Float Switches (weight in oz)

Accessory Kits	Tapped-at-Top Floats (#304 SS)		Center-Hole Floats (#304 SS) [1]		Additional Tubing (#303 SS) [2]	
Used on Class 9036 Float Switch Types	All Except GW, GR, and Form C		GW, GR, and Form C		All	
Catalog Number	9049A6	9049A6S	9049A6C	9049A6CS	9049T1	9049T1S
Tubing (rod)	5 ft brass	5 ft SS	5 ft brass	5 ft SS	2.5 ft brass	2.5 ft SS
Net buoyancy in water, 7 in. float [3]	60	60	70	70	—	—
Combined weight of stops	3	3	6	6	—	—
Number of stops	2	2	4	4	—	—
Weight of 5 ft rod, included	18.5	16.9	18.5	16.9	—	—
Weight per ft of extra rod	3.7	3.4	3.7	3.4	3.7	3.4

[1] Require the use of the 9049A6 or 9049A6S kit. The additional tubing only attaches to other lengths of tubing.

[2] Additional tubing kits add on to the float accessory kits and include a connector.Maximum recommended tubing length: **Tapped-at-top float:** 12.5 ft (3810 mm); **Center-hole float:** 30 ft (9144 mm).

[3] Net buoyancy calculated with float 80% submerged, allowing for a 20% operating margin. Buoyancy data calculated for use in water. Consult the Sensor Competency Center for buoyancy data in media having specific gravity different than water (1.0).

When ordering, first specify the desired accessory kit, then as a second item give the number of additional tubing kits required. For example, to get a 9049A6C kit with 15 ft of tubing, specify:

A. 9049A6C, quantity = 1 (includes 5 ft of tubing)

B. 9049T1, quantity = 4 (2.5 ft of tubing each, for a total of 10 additional ft)

Example	Calculation example Measuring 15 ft of tank depth	Float buoyancy	70.0 oz
		Total weight	(61.5 oz)
	System has 15 ft of brass rod, 4 stops, and a center hole float.	Weight of stops:	(6.0 oz)
		Weight of 5 ft of brass rod (included):	(18.5 oz)
	Buoyancy is positive, so no compensating spring is required	Weight of 10 ft of brass rod (separate):	(37.0 oz)
		Buoyancy	8.5 oz

Class 9036 Type FG and Class 9049 Accessories

Class 9036 Type FG30 pedestal-style sump pump switches provide:

• Liquid level control with pumps operated by an electric motor, either directly or through a magnetic starter

• Activation of alarms in liquid level control systems

• Forward or reverse action (field selectable)

The upward or downward movement of the lever arm controls the On and Off positions corresponding to the water level changes required to turn the pump or alarm on and off.

PUMPTROL™

Class 9037 Type E Closed Tank Float Switches

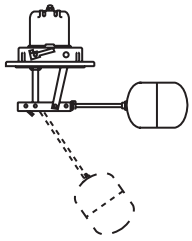
Class 9037 closed tank float switches are used primarily on condensate pumps but may also be installed on closed industrial and diesel fuel day tanks. There are two types of Class 9037 float switches:

- Type E (flange mounted)
- Type H (with screw-in bushing)

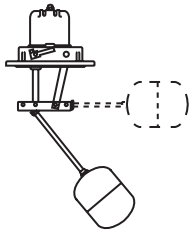
Class 9037 Type E Flange-Mounted Float Switches

Table 15 contains ordering information for Class 9037 Type E float switches. Order the rod and float accessory kits separately. Contact the Sensor Competency Center when using Class 9037 float switches in liquids with a different specific gravity than water (1.0).

Float Position 1



Float Position 2



Float Position 3

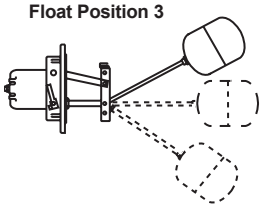


Table 15: Class 9037 Type E Float Switches

Specifications		
Application		Closed industrial tanks Flange mounted
Float movement		Transmitted through a quad ring seal, which may need occasional replacement
Tank Pressure		Up to 50 psi
Temperature	**Ambient**	Up to 200 °F

PUMPTROL™

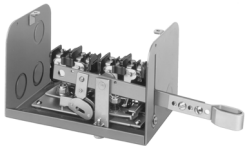
Class 9038 Type A Mechanical Alternators

Class 9038 mechanical alternators provide a simple, positive means of mechanically alternating two pumps or motors. These alternators are used on devices that are installed in a duplex system with a common tank. There are three types of Class 9038 mechanical alternators:

- Type A (open tank and sump)
- Type C (with bushing)
- Type D (flange mounted, vertical)

When liquid level rises to the first level, one pump turns on. Both pumps automatically turn on when a peak condition occurs and the liquid level continues to rise. If Form N5 or N25 is present, and the water level continues to rise, a high water alarm is activated.

Mechanical alternators can be ordered with a manual transfer selector switch (Form N3), which allows the operator to select which pump cuts in first. The second pump only operates under peak demand conditions or if the first pump fails. When the switch is disengaged, the alternator reverts to normal operation. Another option (Form N4) allows the alternator to be used as a two-level non-alternating unit.



9038AG1

Class 9038 Type A Open and Sump Tank Mechanical Alternators

Table 21 contains ordering information for Class 9038 Type A mechanical alternators, including factory installed modifications. Order float accessories separately. Contact the Sensor Competency Center when using Class 9038 alternators in liquids with a different specific gravity than water (1.0).

When ordering a factory modification, add the Form number to the end of the mechanical alternator catalog number. For example, to select a 9038AG1 alternator with reverse action, order 9038AG1R.

Table 21: Class 9038 Type A Mechanical Alternators

Specifications	
Application	Open and sump tanks using duplex pumps
Float Movement	Float operated
Ambient Temperature	–22 to +200 °F

Maximum Weight of Tubing and Stops Supported by the Compensating Spring (oz)		47	41	33	30	74	85

[1] Add 2 oz for high water alarm (Form N5 or N25).

[2] Rod length determined using Class 9049 rod material (0.38 in. / 10 mm O.D. tubing).

[3] Other types of rod must be weighed and compared to the “Maximum Weight of Tubing and Stops” row above.

Accessory Kits

Table 23 lists the Class 9049 accessory kits for Class 9038 Type A alternators. The accessories are ordered separately from the alternators. Order tapped-at-top floats for Type AG1 (except form C) and center-hole floats for Types AG1C, AW1, and AR1.

Table 23: Class 9049 Accessories for Class 9038 Type A Float Switches (weight in oz)

Accessory Kits	Tapped-at-Top Floats (#304 SS)		Center-Hole Floats (#304 SS)		Additional Tubing [1]	
Catalog Numbers	**9049A6**	**9049A6S**	**9049A6C**	**9049A6CS**	**9049T1**	**9049T1S**
Tubing	5 ft brass	5 ft SS	5 ft brass	5 ft SS	2.5 ft brass	2.5 ft SS
Net buoyancy in water, 7 in. float [2]	60	60	70	70	—	—
Total weight of stops	3	3	6	6	—	—
Number of stops	2	2	4	4	—	—
Weight of 5 ft rod, included	18.5	16.9	18.5	16.9	—	—
Weight per ft of extra rod	—	—	—	—	3.7	3.4

[1] Additional tubing kits add on to the float accessory kits and include a connector. Maximum recommended tubing length for tapped-at-top float: 12.5 ft (3810 mm).

[2] Net buoyancy calculated with float 80% submerged, allowing for a 20% operating margin. Buoyancy data calculated for use in water. Contact the Sensor Competency Center for buoyancy data in media having specific gravity different than water (1.0).

When ordering float accessories, first specify the desired accessory kit, then as a second item, give the catalog number and the quantity of the additional tubing kits required. For example, for a 9049A6C kit with 15 ft of tubing, specify:

A. 9049A6C, quantity = 1 (includes 5 ft of tubing)

B. 9049T1, quantity = 4 (2.5 ft of tubing each, for a total of 10 additional ft)

Class 9049 Rod Kits for Class 9038 Type D

Float Travel

Float travel is determined by the length of the hinge post and rod and by the float position. The float may be operated in three different positions. In Position 1, the contacts close when the liquid rises. In Position 2, the contacts open when the liquid rises. Use Table 27 to select the appropriate rod kit when ordering Class 9038 Types DG7, DW7, or DR7 alternators.

Table 27: Class 9049 Rod Kits for Class 9038 Type DG7, DW7, and DR7 Alternators

Float Travel for Class 9038 Types DG7, DW7, and DR7 Alternators Minimum Water Level Change (V = 2.63 in. / 67 mm)							
Catalog No.		**9049ER1**	**9049ER2**	**9049ER3**	**9049ER5**	**9049ER7**	**9049ER12**
Dimensions in. (mm)							
R		1.75 (44)	2.5 (64)	3.25 (83)	5.25 (133)	7.25 (184)	12.25 (311)
H [1]		8.25 (210)	9 (229)	9.5 (241)	11.75 (298)	13.75 (349)	18.75 (476)

	Max.	3.75 (95)	4 (102)	4 (102)	4.38 (111)	4.63 (117)	5.75 (146)

[1] Add 2.5 in. (64 mm) to **H** when using HF3 or HF4 floats.

Use the following table to select the appropriate rod kit when ordering Class 9038 Type DG10, DW10, or DR10 alternators.

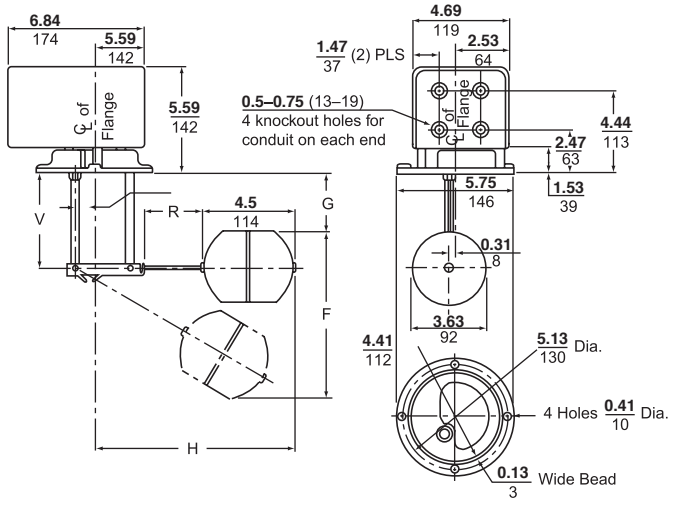
Table 30: Class 9049 Rod Kits for Class 9038 Type DG10, DW10, and DR10 Alternators

Float Travel for Class 9038 Types DG10, DW10, and DR10 Alternators Minimum Water Level Change (V = 4.69 in. / 119 mm)							
Dimensions in. (mm)		**9049ER1**	**9049ER2**	**9049ER3**	**9049ER5**	**9049ER7**	**9049ER12**
R		1.75 (44)	2.5 (64)	3.25 (83)	5.25 (133)	7.25 (184)	12.25 (311)
H [1]		7.5 (191)	8.25 (210)	9 (229)	11 (279)	13 (330)	18 (457)
A	**Min.**	0.5 (13)	1 (25)	1.5 (38)	2.5 (64)	3.25 (83)	6 (152)
	Max.	1.5 (38)	2 (51)	2.5 (64)	4 (102)	5.5 (140)	9.25 (235)
B	**Min**	8 (203)	8.75 (222)	9.5 (241)	11.5 (292)	13.5 (343)	18.5 (470)
C	**Min.**	7 (178)	7.75 (194)	8.25 (210)	10 (254)	11.5 (292)	15.5 (394)
	Max.	7 (178)	7.5 (191)	8.25 (210)	10 (254)	12 (305)	17 (432)
D [2]	**Min.**	1.75 (44)	1.75 (44)	1.5 (38)	1.25 (32)	1 (25)	0.5 (13)
	Max.	0.5 (13)	0.25 (6)	0.0 (0)	1 (25)	1.5 (38)	2.75 (70)
F	**Min.**	8.75 (222)	10.5 (267)	11 (279)	12.75 (324)	14.5 (368)	19 (483)
	Max.	8.5 (216)	9 (229)	9.5 (241)	10.5 (267)	12 (305)	15.75 (400)
G	**Min.**	3.25 (83)	3.5 (89)	3.5 (89)	3.75 (95)	4 (102)	4.75 (121)
	Max.	4.75 (121)	5 (127)	5.25 (133)	6 (152)	6.75 (171)	8.5 (216)

[1] Add 2.5 in. (64 mm) to H when using HF3 or HF4 floats.

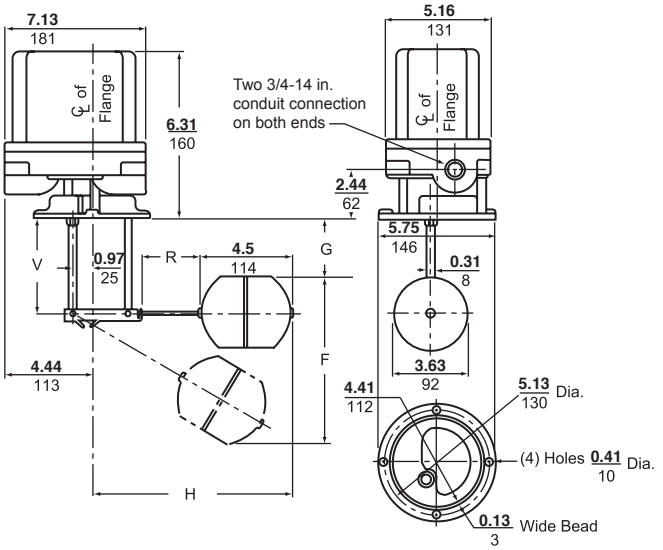
[2] D is negative when the top of the float is below the horizontal centerline.

Figure 24: Type DG Dimensions



Note: The recommended size of hole in the tank for the entry of the float and mounting of the control is 4.19 (106).
Floats shown are Type EF, 4.5 (114) long.
Add 2.5 (64) to H if using Type HF Floats, which are 7.0 (178) long.

Figure 25: Type DR/DW Dimensions



Class 9049 Accessories and Class 9998 Renewal Parts Kits

Table 31: Class 9049 Accessories

Catalog Number	Description	Equipment To Be Serviced
9049A6	7 in. Tapped at Top #304 Stainless Steel Float, 5 ft Brass Rod, 2 Stops	All 9036, 9038A
9049A6C	7 in. Center Hole #304 Stainless Steel Float, 5 ft Brass Rod, 4 Stops	All 9036, 9038A
9049A6CS	7 in. Center Hole #316 Stainless Steel Float, 5 ft Stainless Steel Rod, 4 Stainless Steel Stops	All 9036, 9038A
9049A6S	7 in. Tapped at Top #316 Stainless Steel Float, 5 ft Stainless Steel Rod, 2 Stainless Steel Stops	All 9036, 9038A
9049A13	Compensating Spring	9036GG
9049A54	Mounting Bracket—Replacing Obsolete 9036A with 9036G	9036GG
9049A55	Mounting Bracket—Replacing 9036A (S or F1) with 9036G	9036GG
9049A58	Form R Lever	9036DG
9049EF1	#304 Stainless Steel Float (do not remove ballast)	9037E, 9038D
9049EF2	#316 Stainless Steel Float (do not remove ballast)	9037E, 9038D
9049ER1	1-3/4 in. Stainless Steel Rod	9037E, 9038D
9049ER2	2-1/2 in. Stainless Steel Rod	9037E, 9038D
9049ER3	3-1/4 in. Stainless Steel Rod	9037E, 9038D
9049ER5	5-1/4 in. Stainless Steel Rod	9037E, 9038D
9049ER7	7-1/4 in. Stainless Steel Rod	9037E, 9038D
9049ER12	12-1/4 in. Stainless Steel Rod	9037E, 9038D
9049GF1	#304 Stainless Steel Float (do not remove ballast)	9037G
9049HF3	#304 Stainless Steel Float (do not remove ballast)	9037H, 9038C, D [1]
9049HF4	#316 Stainless Steel Float (do not remove ballast)	9037H, 9038C, D [1]
9049T1	Additional Rod Kit: One 2-1/2 ft Section of Brass Rod, Connector	9049A6, A6C
9049T1S	Additional Rod Kit: One 2-1/2 ft Section of Stainless Steel Rod, Connector	9049A6S, A6CS
9049UMS1	Universal Mounting Bracket	All 9036; 9038AG, AR, AW

[1] Not recommended for 9038D mechanical alternators. 9049EF1 (#304 SS) and 9049EF2 (#316 SS) are recommended instead.

Renewal parts are generally available for Pump Control products with a current date code or with a numerical date code (such as 172, which corresponds to the first quarter of 1972). Parts are no longer available for devices manufactured before 1965.
